This textbook includes discussion on data that is not easily available on financial services, along with analyzing latest trends, new emerging areas, (an integral part of the syllabus in all leading business schools), the essential concepts of the financial system and the regulatory framework, and all the developmental aspects of finance. The book also studies the pace of progressive integration of financial markets?banking, insurance, mutual funds, securities and commodities with high technology absorption?to focus on customer-based services. At the same time, it covers oft-discussed but essential topics like real estate investment trust, consumer finance and investment banking.
